Not Detected	RNA specific to SARS CoV2 not detected
Detected	RNA specific to SARS CoV2 detected,

Note

1. ICMR Registration number for COVID -19 is DRPBHP.
2. Negative result does not rule out the possibility of Covid-19 infection. Presence of inhibitors, mutations & insufficient RNA specific to SARS-CoV-2 can influence the test result. Kindly correlate the results with clinical findings. A negative result in a single upper respiratory tract sample does not rule out SARS-CoV-2 infection. Hence in such cases a repeat sample should be sent. Lower respiratory tract samples like Sputum, BAL, ET aspirate are appropriate samples especially in severe and progressive lung disease.
3. Kindly consult referring Physician / Authorized hospitals for appropriate follow up.
4. NP & OP : Nasopharyngeal & Oropharyngeal Swab , BAL : Bronchoalveolar Lavage, ET Aspirate : endotracheal Tube Aspirate
5. Test performed on TrueNAT RT PCR as per patient request/choice.
6. As per Delhi High Court order date 11.12.2020 in W.P.(C) 10169/2020, the price cap of Rs 800 does not apply on TrueNAT/CBNAAT/iNAAT based RT PCR For SARS CoV2.
